GÜL GÜMÜŞDERE

Data Analyst | Business Operations | BI & Analytics

Istanbul, Turkey • gulgulumser@gmail.com • linkedin.com/in/gul-gumusdere • gulgumusdere.github.io • github.com/gulgumusdere

PROFESSIONAL SUMMARY

Data Analyst with hands-on expertise in SQL, BigQuery, Tableau, Power BI, and Looker Studio (Data Studio). Brings a unique advantage: 14 years of running data-driven businesses in hospitality — managing revenue, occupancy rates, dynamic pricing, and operational KPIs independently. Recently expanded into applied Machine Learning through a hands-on internship — building and validating full model pipelines in Python. Combines a strong analytical toolkit with real-world business intuition to deliver insights that drive decisions, not just dashboards.

PROJECTS

Content Performance Prioritization Model (ML Capstone) | *Python · scikit-learn · SQL · DuckDB*

End-to-end machine learning pipeline built on ~1M rows of real production search-performance data.

- Compared a rule-based baseline against a Logistic Regression model using client-grouped cross-validation to prevent data leakage
- Ran systematic leakage and split-validity checks; published all findings — including where the simpler baseline outperformed the model — in a reproducible, publicly deployed research paper
- Project reviewed and approved by FlyRank

View Research Paper | View GitHub Repository

GA4 E-Commerce Funnel Analysis | *BigQuery · SQL · Tableau Public*

End-to-end funnel analysis of real GA4 e-commerce event data to identify drop-off points and quantify business impact.

- Built multi-CTE SQL query in BigQuery using session-level binary funnel logic and nested field extraction
- Visualized full funnel across a 10-sheet interactive Tableau Public dashboard with KPI cards and dynamic filters
- Key findings: 78% drop-off at Session→Product View; 38% drop-off at Shipping→Payment

View SQL on GitHub | View Tableau Dashboard | Watch Loom Walkthrough

Supermarket Sales Analysis | *Power BI · DAX · Data Modeling*

Interactive Power BI dashboard analyzing sales performance across product categories, cities, and payment methods.

- Built visuals for monthly revenue, quantity by product line and city, average price by product line, and sales by payment type
- Added month and currency (USD/TRY) slicers with cross-filtering across visuals
- Key finding: sales split almost evenly across cash, credit card and e-wallet, each about one-third of the total

Sales, Profit & Delivery Analysis | *Tableau Public · Superstore Dataset 2020–2023*

- Developed time-series analysis, calculated metrics, geographic visualizations, and user-driven interactivity

WORK EXPERIENCE

AI/ML Intern | FlyRank AI (Remote)

July 2026 – Present

- Completing an applied Machine Learning internship (FlyRank AI Intern, ML Cohort 1) covering the full ML lifecycle — data contracts, feature engineering, leakage prevention, model validation, and research communication — on a real production search-analytics dataset
- Built and deployed a full ML research pipeline (~1M rows): compared a rule-based baseline against a Logistic Regression model using client-grouped cross-validation, ran leakage and split-validity checks, and published a reproducible research paper — reviewed and approved by FlyRank

Operations Manager | Lamoda Aparts Kaş

June 2023 – October 2025

Sole operator managing all business functions of a 10-unit boutique apart-hotel with on-site café.

- Tracked and analyzed occupancy rates, seasonal revenue, and cost performance using Excel/Google Sheets dashboards
- Managed dynamic pricing strategy by monitoring competitor rates on Booking.com and Airbnb — achieving full-season occupancy (mid-June to late October) consistently
- Processed and reconciled all reservation data across OTA platforms; maintained real-time availability reporting
- Handled end-to-end operational workflow: reservations, guest communications, vendor management, and financial reporting — single-handedly

Operations Manager & Business Partner | Aylak Yaşam Kamp Çıralı

May 2012 – October 2019

Ran all operations of a 2,000 sqm glamping property with 12 diverse accommodation units, shared facilities, and full-board catering.

- Scaled operations to host 100+ guests per peak period; achieved full-season capacity utilization across all seasons
- Designed and maintained all operational tracking in Excel/Google Sheets: reservations, income/expense analysis, and guest flow data
- Applied data-informed pricing strategy based on competitor benchmarking and seasonal demand patterns
- Managed all procurement, budgeting, supplier relationships, and guest experience independently

SKILLS

BI & Visualization: Tableau, Power BI, Looker Studio (Data Studio), Microsoft Excel, Google Sheets

Databases & Querying: SQL (PostgreSQL), BigQuery (GA4 event data), DBeaver

Machine Learning: Python, scikit-learn (Logistic Regression), pandas, model validation (cross-validation, leakage & split-validity testing)

Analytics: Funnel Analysis, EDA, KPI Tracking, Data Visualization, Descriptive Statistics, A/B Testing, Google Analytics 4 (GA4), Amplitude

Business Skills: Revenue Management, Dynamic Pricing, Operational Reporting, Budget Management

EDUCATION

Data Analyst Training Program | GoIT Global — 2026

Web Design and Coding (2nd Degree) | Anadolu University — 2026

BSc Business Administration | Abant İzzet Baysal University — 2005

LANGUAGES

Turkish — Native | English — Intermediate
